Attn : Mr. Vishal Srivastava

Sub : Zinga Coatings for Corrosion Protection of Metals for various applications

Dear Sirs,

This has reference to your letter No.11-31-001-150-V2/100198 dated October 21, 2010 addressed to our Chairman on the above subject.

We have studied the technical specification / data sheet, test reports and third party certification documents, along with the copy of MOU between Zinga Metal, Belgium and SRMB Kolkata.

From the supporting documents submitted, Zinga Coatings with topcoat is an effective protective coating system for protection of metallic structures, piping and equipments, tanks etc. in various corrosive atmospheric environments in industries including oil, gas, petrochemical, chemical and process industries, offshore platforms, marine installations and power plants for structures, piping, TMT bars and equipments for various applications. For our various jobs we would recommend Zinga Coatings as special coatings required for specific applications for corrosion protection in various corrosive atmospheric environments as per current procedure of incorporating special coatings for corrosion protection.

Zinga Coatings can be used for coating on all components wherever hot dip galvanizing cannot be carried out due to limitations of size of the components or due to limitations of locations, and for restoring the corrosion resistant properties of the welded locations of galvanizing components at site. It is also eminently suited for rehabilitating existing in-service structures, erected out of hot dip galvanized components, during the course of their lives.

Thanking you,

Very truly yours,

(Dr. V.R. Krishnan)
